<i>National Natural Landmarks</i>	2
<i>National Park Units</i>	0

Congressional Districts 13

Local Government Units 1,067

Profile

This canal was built in the 1830s and '40s along the portage between Lake Michigan and the Illinois River, which had long been used as an American Indian trade route. The canal rapidly transformed Chicago from an isolated crossroads into a critical transportation hub between the East and the developing Midwest. A 61-mile recreational trail follows the canal towpath.
